

Green Party of New Mexico calls for Impeachment

The New Mexico Green Party renews its call to impeach President Bush and Vice President Cheney joining a renewed national call on the new Congress to fully investigate the actions of Mr Bush and Mr Cheney in light of their responsibility to uphold the Constitution of the United States.

According to Carl Hansen, Green Council representative from Santa Fe, "There needs to be an investigation into The Bush administrations alleged illegal activities. If they are proved in a court of law to be illegal and unconstitutional it will send a signal to future presidents."

Evidence of High Crimes and Misdemeanors are included in the statement passed at the Green Party National Meeting July 2003. According to the statement, the Green Party (US) endorsed a call to Congress to initiate impeachment proceedings and resolved to take political leadership in the growing movement for impeachment.

The resolution cites President George W. Bush's and Vice President Dick Cheney's "pattern of making false statements to Congress, the American people, and the world to win support for actions by the American government and military forces" in violation of the U.S. Constitution, Charter of the United Nations, and other international laws; "[s]quandering the resources of the American people to serve the interests of transnational corporations"; and war crimes, including the use of depleted uranium and cluster bombs in the preemptive invasion of Iraq.

According to the resolution, "Evidence has emerged that the intelligence agencies of the United States had repeatedly informed the President that Iraq had no weapons of mass destruction nor means to threaten the United States, and that alleged evidence produced by the administration was fraudulent." The resolution also authorizes the Green Party's Peace Action Committee (GPax) to coordinate party activities with other organizations that have called for impeachment.
